FOR BEST RESULTS:

DO NOT use extension cords to connect dispenser!
DO NOT obstruct air intake or discharge openings!
DO NOT put objects or fingers in panels, louvers or faucet outlet!
DO NOT CHANGE SETTINGS! THEY ARE AT THEIR OPTIMAL SETTINGS!

INSTRUCTIONS

1. Mix one container (½ gal. of concentrate) plus 2 gallons of water together in a bucket or large bowl. Makes approximately 40 - 8 oz. servings. Takes approximately 1 hour for fluids to freeze.
*** Alcohol slows the freezing process!!! Either add alcohol after you have poured the drinks or add it to the mixture AFTER one hour of mixing.
2. Pour mixture in to machine's bowl, up to maximum fill-line. **DO NOT OVERFILL!**
3. Install the cover and check that it is correctly placed over the bowl. The dispenser must always run with the cover installed to prevent a possible contamination of the product.
4. TO OPERATE UNIT:
 - a. Make sure barrel (container) is correctly snapped in.
 - b. Set the power switch to 'I' ON position.
 - c. Set the mixer/refrigeration switch to 'II' FROZEN position. If mixture begins to clump or over freeze turn switch to 'I' CHILLED position.
 - d. Set the light switch to 'I' ON position.
5. To refill unit, repeat steps 1 and 2.
To expedite freezing of next batch refrigerate the mixture prior to pouring into the machine.
DO NOT FREEZE!

CLEAN UP

1. Empty contents by pulling lever.
2. Add 1 gallon of clean water and drain again.

!!! DO NOT DISASSEMBLE THE MACHINE !!!
